

## PERMASET AQUA STANDARD

The flagship water-based textile screen printing ink from Colormaker, PERMASET AQUA Standard, Glow and Process Color ranges are based on a 100% solvent free, environmentally friendly formula that provides intense pigments rich in coverage with exceptional color yield. The resilient resin base is at once both soft and incredibly strong – holding up beautifully to even the most severe rub and wash tests. Available in 19 Standard Colors, 8 Glow, 4 CMYK Process Colors, 4 Metallic Colors and Print Paste. See what the fuss is about.

**PERMASET AQUA Standard, Glow and Process Colors are ideal for printing on:**

| Light Toned Fabrics | Natural and Synthetic Fibers | Dark Toned Fabrics (print over PERMASET SUPERCOVER First Down White as the underbase)

**Rub Resistance:** Strong

**Handle:** Soft

**Transparency:** Transparent, giving exceptionally vibrant color. Standard White is opaque

**Drying:** Heat cure

**Mesh:** Monofilament polyester 110-305 tpi

**Stencil Type:** Must be water resistant, fully dried and fully cured

**Clean Up:** Water

**Increase Screen Open Time:** Add 1-2% PERMASET Print Retarder

**Applications:** T-shirts, flags, banners, sports and fashion wear, scarves, swimwear, upholstery and window furnishings, yardage, cushions, table and bed linen, tea towels and tote bags

**Fabrics:** Cotton, cotton polyester blends and most synthetic fabrics
