

## PERMASET AQUA SUPERCOVER

Using advanced polymer technology in PERMASET SUPERCOVER, Colormaker has created a water-based screen printing ink that provides unsurpassed color opacity on the darkest fabrics, while maintaining minimal hand. Available in 13 Standard Colors, Black, White, First Down White, 8 Glow Colors, 4 Metallic Colors and SUPERCOVER Print Paste.

PERMASET SUPERCOVER First Down White is designed as an opaque under-base for over-printing. The under-base also improves adhesion and rub-resistance of the top layer.

### **PERMASET SUPERCOVER is ideal for printing on:**

| Dark Toned Fabrics | Natural and Synthetic Fibers |

**Rub Resistance:** Strong

**Handle:** Minimal

**Transparency:** Opaque

**Drying:** Heat cure

**Mesh:** Monofilament polyester 110-225 tpi

**Stencil Type:** Must be water resistant, fully dried and fully cured

**Clean Up:** Water

**Increase Screen Open Time:** Add 2-5% PERMASET Print Retarder

**Applications:** T-shirts, flags, banners, sports and fashion wear, scarves, swimwear, upholstery and window furnishings, yardage, cushions, table and bed linen, tea towels and tote bags

**Fabrics:** Cotton, cotton polyester blends and most synthetic fabrics
